

'Commissioning Rehabilitation: Practical Guidance for Service Providers'
University of Sheffield 20 September 2007

This is a conference being organised by the Community Rehabilitation Team (CRT) Network, a national network of teams and individuals who have an interest in 'community rehabilitation' and who work within rehabilitation and intermediate care settings, to a client centred model. The teams work across education, health (mental health) and social care (local government).

Come and network with our expert panel of speakers and other delegates. Participate in a practical session that considers commissioning challenges you are likely to face in a rapidly changing healthcare service. This is a conference that will tell you what you need to know about:

What commissioners want

What you need to take into account when marketing your service to commissioners

Key workforce issues including redesign and development

How to redefine your service to meet commissioning priorities

Please note that the registration fee increases after 31 July and as a member of the British Association of Prosthetists and Orthotists you are eligible for a further 10% discount on this price.

Please mark on the booking form **BAPO10**
